NOUREDDINE EL HASNAOUI

FULL STACK DEVELOPER

EDUCATION

2025
EFE-MAROC

- Full Stack Development Certification - Obtained

2023 – Present
ÉCOLE INFODESIGN

- IT Specialist Technician

PROFILE SUMMARY

Certified Full Stack Developer with expertise in Java (Spring Boot), React/Next.js, and Laravel. Experienced in building scalable web applications, e-learning platforms, APIs, and AI-driven projects. Strong background in database management, UI/UX design, and cloud-ready architecture. Passionate about clean code, performance optimization, and delivering user-friendly solutions.

SKILLS

- Languages & Frameworks: Java (Spring Boot), React.js, Next.js, Node.js, PHP (Laravel)
- Databases: MySQL, PostgreSQL, MongoDB, Supabase
- API Development: RESTful APIs, JWT Authentication, Secure Integration
- Deployment: Vercel (Next.js), Hostinger VPS (Laravel & Spring Boot), Nginx, SSL
- Tools: Git, GitHub, Docker (basic), Postman
- UI/UX: Figma, Canva
- Soft Skills: Problem Solving, Teamwork, Communication, Time Management
- Languages: French, English, Arabic

PROJECTS

E-Training Center Platform (Spring Boot + Next.js)

- Designed and developed a training center platform for formations en matières appliquées.
- Backend (Spring Boot + PostgreSQL): Secure JWT authentication, role-based access control.
- Frontend (Next.js): Clean, interactive, and responsive design.
- Features:
- Video course access with progress tracking
- Certifications upon completion
- Stripe integration for secure payments
- Admin dashboard for course & user management
- Deployment: Frontend deployed on Vercel, backend on Hostinger VPS with SSL + Nginx.

Music Learning Platform

- Implemented secure user authentication, dynamic content rendering, and a product/course catalog.
- Designed intuitive UI for learning and shopping experiences.
- Processes payments via Stripe integration

Web-Based AI Voice Agent

- Created an intelligent web agent capable of executing voice commands using NLP and AI models.
- Engineered backend logic with Python, leveraging libraries like NumPy and PyTorch for smart interpretation.
- Developed basic task automation and program execution logic through voice.
